

MOTOTRBO"

DP3600/DP3601/DP3400/DP3401 Portable Radios

Portable radios available in Display and Non-Display, **GPS and Non-GPS models**.

Uses Time-Division
Multiple-Access (TDMA)
digital technology which
doubles the number of
users on a single licensed
12.5 kHz channel.

Integrates voice and data to increase operational efficiency.

Provides **clearer voice communications** throughout the coverage area.

Up to **40 percent longer** battery life between recharges.

Enhanced call management features include call alert, emergency, remote monitor, push-to-talk ID, radio check, private call, all call, radio disable.

Features the **transmit interrupt** suite—voice interrupt, remote voice dekey, emergency voice interrupt or data over voice interrupt—to help prioritise critical communication exactly when needed.

IP Site Connect provides automatic roaming from one coverage area to another with no manual intervention or interruption.

The **enhanced privacy** mode further protects the voice and data communications.

Emergency button alerts supervisor or dispatcher in an emergency situation.

Optional **Capacity Plus** trunking enables repeaters to manage the availability of active channels. Users are automatically connected to co-workers without switching channels.

Lone Worker feature alerts supervisor or dispatch by sending out an alarm when there is no radio activity over a specified duration of time.

Allows an **easy migration** from analogue to digital with the ability to operate in both modes.

DP3601 can **transmit location coordinates** with an emergency call.

Send short free-form and quick **text messaging** via programmable buttons.

DP3600/DP3601 contacts list allows up to **500/1000 contacts** (analogue/digital).

Meets **IP57 submersibility** standard along with U.S. Military Standards 810 C, D, E, and F and Motorola standards for durability and reliability.

Offered with an intrinsically safe option certified by Factory Mutual Approvals (FM) for use in hazardous classified areas. Can be used in locations where flammable gas, vapors or combustible dust may be present.

Accessory connector meets IP57 submersibility specifications, incorporates RF, and USB and utilises the IMPRES™ Audio System for enhanced audio functionality.

Utilises Motorola's state-of-the art **IMPRES** technology—providing **longer talk times and clearer audio delivery**.

Accelerate performance.

The next-generation professional two-way radio communications solution is here, with more performance, productivity and value – thanks to digital technology that delivers increased capacity and spectrum efficiency, integrated data communications and enhanced voice communications.

MOTOTRBO complies with the European Telecommunications Standards Institute (ETSI) Digital Mobile Radio (DMR) tier two standard, a globally recognised and approved standard for the professional two-way radio market.

MOTOTRBO offers you a private, standards-based, cost-effective solution that can be tailored to meet your unique coverage and feature needs. This versatile portfolio provides a complete system of portable radios, mobile radios, repeaters, accessories and data applications.
